Microsoft 365, Azure, Endpoint Security, Power BI, Microsoft Copilot Studio, Microsoft Copilot Administration,

Tools, Scripting & Operating Systems:

ServiceNow, Jira, Confluence, PowerShell, Bash, Windows, macOS, Linux

PROFESSIONAL EXPERIENCE

Desktop Administrator | Fundserv, Toronto (Full-time)

August 2024 – Present

Fundserv connects the Canadian investment industry through reliable technology services that enable secure and automated transaction of business on a centralized network.

- Managed enterprise Windows and macOS endpoints across Microsoft Intune, JAMF Pro, SCCM, Azure Virtual Desktop, NinjaOne and Microsoft 365, implementing compliance policies and endpoint security controls to maintain a secure and reliable environment.
- Administer Azure Virtual Desktop (AVD) infrastructure, **reducing Azure costs by 50%** through strategic optimization.
- Lead enterprise macOS management by deploying applications, enforcing compliance policies, and maintaining security baselines.
- Designed and implemented automated onboarding/offboarding workflows using ManageEngine ADManager Plus, covering Active Directory provisioning, Microsoft Entra ID group assignments, Teams channel access, and distribution list management — cutting onboarding time by **90% (from multiple days to under two hours)** while scaling to **200+ users**.
- Partner with infrastructure and security teams to automate endpoint administration and strengthen device security.
- Developed and maintained executive-level IT reporting, dashboards, and inventory metrics, providing leadership with actionable insights into device management, service performance, and operational trends.

Junior Desktop Administrator | Fundserv, Toronto (Co-op)

September 2023 – April 2024

Fundserv connects the Canadian investment industry through reliable technology services that enable secure and automated transaction of business on a centralized network.

- Supported Azure Virtual Desktop administration and performance optimization.
- Assisted with Microsoft Intune enrollment, configuration profiles, and device compliance.
- Managed incidents and service requests using ServiceNow.
- Authored technical documentation in Confluence.
- Delivered Windows and macOS end-user support.

IT Support | Seneca College, Toronto

Aug 2022 – Aug 2024

Seneca Polytechnic prepares students for careers through a blend of academic and practical education.

- Delivered Tier 1 and Tier 2 IT support for faculty and students.
- Supported classroom and hybrid learning technologies.
- Resolved hardware, software, and account-related technical issues.

KEY PROJECTS

Identity Lifecycle Automation – ManageEngine ADManager Plus

- Designed and implemented automated onboarding and offboarding workflows using ManageEngine ADManager Plus.
- Automated Active Directory account provisioning, Microsoft Entra ID group assignments, Microsoft Teams channel access, distribution list membership, and user deprovisioning.
- **Reduced onboarding time by 90% and automated provisioning for 200+ users**, improving operational efficiency and ensuring consistent identity lifecycle management.

JAMF Pro Implementation

- Designed enterprise macOS management framework.
- Configured compliance policies and software deployment.
- Improved endpoint security through standardized device management.

Microsoft Entra ID Access Packages

- Implemented automated external user access workflows.
- Configured entitlement management and access reviews.
- Reduced manual provisioning while improving governance.
